

D-Bar-A Scout Ranch Star Party

March 24, 2018.....4:00 pm until ?

Main Speaker: Bob MacFarland “What About Our Moon?”

Meteorite Display: Mark Jeffery

Possible unicycle/juggling act by Jeff Macleod

View the Sun through solar telescopes until dark and then view the planets, star clusters, galaxies, nebula, etc.

- Get information from one of the four astronomy clubs near you for support of the Astronomy Merit Badge.
- Make a Star Finder similar to the one used by Cranbrook Institute of Science.
- Plans are to have Astronomy Merit Badge Counselors available during the day.
- Unit Leaders, take this opportunity to get the training necessary to use the observatory when you are camping. A great way to guide your youth in the subject of astronomy.

The Star Party will be held at the Trout Lake cabin (viewing) and Wyckoff Lodge (light dinner and presentations).
